At the beginning of this course, we said that this course would enable you to:

- Describe architecture.
- Analyze requirements and select architecturally significant requirements
- Define and classify nonfunctional requirements and explain how to architect for them
- Explain an Architecture Overview and how it fits in with the Component and Operational Models
- Define architecture decisions and principles and describe how to use them
- Identify the functional aspects of an IT architecture and some key principles used in building Component Models
- Explain the key concepts and artifacts of the operational aspects of an IT architecture and how they manifest themselves in Operational Model
- Describe technical reviews and how to incorporate full life cycle validation and verification into architectural thinking
- Understand how architects operate within agile teams and how agile frameworks and approaches affect architectural styles.

What has been the architectural thinking process?

The IBM Architect career path

* Promotion guidelines determined by BU and GEO ; one can continue to grow in certifications notwithstanding Band level

IBM Architect Model – Certification Roadmap

L1 Experienced Level Certification		L2 Expert Level Certification		L3 Thought Leader Certification	
Professions Core - Industry - IBM Design Thinking		Professions Core Requirements from L1		Professions Core Requirements from L1	
Architect Curriculum - Architectural Thinking - Method (TeamSD or UMF)		Architect Curriculum - Requirements from L1 - Project Planning - Consulting		Architect Curriculum - Requirements from L2 - Evidence of continued education	
Project Badges (L1) - Project #1 - Project #2		Project Badges (L2) - Project #3 - Project #4 - Project #5		Project Badges (L3) - Project #6 (T/L criteria) - Project #7 (T/L criteria) - Project #8 (T/L criteria)	
Business Unit badges L1 - Varies by Business unit (BU) and/or Specialty within BU - Part of a BU's requirements for L1 certification if applicable		Business Unit badges L2 - Varies by BU and/or Specialty within BU - Part of a BU's requirements for L2 certification if applicable		Business Unit badges L3 - Varies by BU and/or Specialty within BU - Part of a BU's requirements for L3 certification if applicable	
Leadership Badges (2 examples) - IBM Mentor (req'd) - IC/IP - Speaker/Presenter - Teacher/Educator - Profession Champion		Leadership Badges (3 examples) - IBM Mentor x3 (req'd) - IC/IP - Speaker/Presenter - Teacher/Educator - Profession Champion		Leadership Badges (4 examples) - IBM Mentor x 5 (req'd) - IC/IP - Speaker/Presenter - Teacher/Educator - Profession Champion	
Certification Badge - Required badge set for L1 - L1 Certification Criteria		Certification Badge - Required badge set for L2 - L2 Certification Criteria		Certification Badge - L2 certification - Required badge set for L3 - L3 Certification Criteria	
Single SME Review		Board Review		Board Review

Visit the [Career Model for Technical Professions](#) community for the most up to date version of the roadmap.

All senior roles involve a critical nontechnical skill: Leadership

Architects are important leaders on any project.

Study topics in leadership:

- Books on leadership can usually be found in the business section of your local bookstores.
- Read autobiographies of leaders to learn their leadership techniques.
- Courses in leadership are available.
- Use [*IBM Leadership Academy*](#) materials

Becoming an effective leader requires a commitment to lifelong learning.

To be a leader is to be a teacher.

Here are some other educational opportunities

Here are just a few suggestions to start with:

- Design Thinking
- Team Solution Design (or TeamSD - a pre-sales version of the Architecture Method)
- Operational Modeling
- Component Modeling
- Use Case Modeling
- Performance Engineering
- Solution Optimization (SOP) Techniques
- Business Architecture Fundamentals
- Enterprise Architecture

Review the [Architect Resource Center](#) website.

Note:

- (1) Local geography course codes might vary. Consult [IBM Architect Resource Center](#) and [IBM Your Learning](#) to search for learning activities.

- We do not expect that you will be a “master IT Solution Architect” after attending this course.
- You need to put into practice what you have learned here and continue to “think like an Architect.”
- Follow up on the references you have been given.
- Find a mentor to help you.
- **Start your journey towards Certification**
